Six Hundred Turn Out To Annual Picnic of Sexsmith Legion Buffalo Lake, Sunday

Practically Every Section In The Grande Prairie District Represented; Also Fairview—Grande Prairie Town Band In Attendance—Kiddies Guests Of The Legion—Sports Program Adds To Entertainment—Religious Services Held In Evening; Rev. H. E. Webb of Sexsmith Anglican Church Delivered The Address.

A crowd, conservatively estimated at around 600, turned out to the annual picnic of the Sexsmith branch of the Canadian Legion, held on the sports grounds at Buffalo Lake on Sunday afternoon.

Fairview was represented by Jimmie Walker and wife, until recently residents of Sexsmith.

There was a large contingent from Spirit River, while practically every section in the Grande Prairie district was represented.

Henry Roberts, honorary president of the Grande Prairie branch of the Legion; Jack McKenzie, zone representative, and Mayor P. J. Tooley of Grande Prairie were among those present.

Mr. Roberts, who is one of the oldest of the oldtimers in the Peace River, was busy shaking hands with his many friends.

A large British flag fluttered in the breeze near the baseball diamond.

Members of the Legion were busy all over the grounds seeing to it that no one was overlooked.

The Grande Prairie Town Band, under the leadership of Bert Churchill, during the afternoon rendered a delightful program.

The day proved a big one for the many kiddies present and for once in their young lives they got all the ice cream, peanuts, pop, etc., they wanted.

The picnic idea was carried out and toward evening tablecloths were spread on the grass by the various groups, who enjoyed meals that would indicate a fifty-bushel wheat crop is in sight.

The booth did a land office business. In fact was completely sold out.

The occasion furnished an opportunity for the veterans of the Great War and also oldtimers to meet.

(Continued on Page Seven)

It was a fine day for the picnic and the weather was just what was needed.

The picnic was a success and the Legion was well represented.

PEACE RIVER WHEAT

History was made in Vancouver Tuesday morning June 14, when the first wheat grown in Peace River arrived by direct route to the Pacific Coast. It was presented by H. G. Perry, M.L.A. of Prince George (left) to Dr. G. H. Worthington, president of the Vancouver branch of the Monkmann Pass Highway Association (center), while R. A. Hutchinson of the Publicity Bureau looks on.

The wheat reached British Columbia by way of the Monkmann Pass and has been a year in transit. It was started from Peace River last year by Alex. Monkmann and three associates, who blazed a trail through the pass from Stony Lake to Alsea Lake on the C.N.R. forty-eight miles east of Prince George.

On route, finding the wheat too heavy to carry with their other equipment, the four trail-blazers left it with Martin Fransted, a trapper. Two weeks ago, true to his trust, Fransted and a companion, Henry Holt, took the wheat to Prince George, when they came out of the wilds with their winter catch of furs.

The wheat is the famous Marquis variety and samples are being sent to the University of British Columbia for analysis.

Butter—NOT ICE CREAM—CAME OUT OF POWER FREEZER

KINUSO, July 4.—Ice cream was cut short at the Kinuso sports when one of the ice cream stands unintentionally turned into creamery, it is reported.

With a flair for modernity and efficiency, Harry Hunt equipped his freezer with all the latest appliances, and with no indication that the new batch in the making was yet frozen, he investigated.

Mr. Hunt's amazement was when he found he had butter instead of ice cream.

The cream had been agitated too vigorously before it had sufficiently cooled, with the result that it was churned before it was frozen.

Perhaps many a housewife wishes her cream would churn as easily.

G. P. SPORTS POSTPONED TO AUG. 3 and 4

Rain Thursday night and early Friday morning caused the Grande Prairie Athletic Association to postpone the big two-day sports scheduled for July 1 and 2.

Announcement has been made that the Grande Prairie sports will be held on Wednesday and Thursday, August 3 and 4.

The date was not settled in any way with any other sports event in the district.

The rain caused making for better sports, it is hoped the later date will be popular.

WEMBLEY WAS CENTER OF YOUNG CLOUDBURST ON TUESDAY AFTERNOON

WEMBLEY, July 6.—This town was the centre of a young cloudburst on Tuesday afternoon, which started about 2 o'clock.

The rain covered an area of about two miles square. Streets of the town were running with water and before the downpour stopped, dirt had become small rivers. The people of Wembley are smiling today.

D. H. Koellin, Brownlee, is New President; R. B. Gilpin, Fairview, Secretary—Many Resolutions Passed—Vote of Thanks Tendered Fairview Board of Trade For Their Splendid Hospitality.

FAIRVIEW, July 30.—Seven Boards of Trade were represented at the annual meeting of the Associated Boards of Trade held here on Wednesday afternoon, June 29. The following delegates were present:

C. McNeill, Grande Prairie—O. B. Harris and W. J. Thompson, Beaver Lodge—D. M. Harris and Hubert Sumner, Wembley—H. Trelle and S. B. Allison, Sexsmith—J. P. McIsaac, Fairview—W. A. Hemstock, Mackle, Brownlee—Dave Koellin.

Besides the usual accredited delegates, there were twenty other representatives present.

President J. E. Thompson in his address pointed out what had been accomplished during the past year and suggested matters which should be kept before the organization, mentioning especially travelling, preservation of the land, and the future of the river.

Outline Of Work Finished And Being Done By The Monkmann P. H. Ass'n

Given Over C.F.G.P. By Cressie McNaught, President Of The Association—Makes Strong Appeal To Residents Of Peace River Country That Efforts Be Continued So That Project Will Be Successful And Victory Won For This Now Famous Cooperative Enterprise.

Good evening, ladies and gentlemen.

I presume that the work and progress and difficulties of the Monkmann Pass Highway Association forms a topic of interest to Peace River people.

We as a people are accustomed to obtaining results by our own efforts and by cooperation with our environment. The oldtimers, particularly, have been successful in the necessity of working their own way through the difficulties that confronted them.

It is only natural that we are keenly interested and active in the cooperative movement that is designed to take us to that stage in our development where we will be able to utilize the advantage of our geographical position in relation to the markets of British Columbia.

The work of cutting the preliminary trail through the Monkmann Pass was started and is being carried on by a cooperative enterprise.

It is in reality a gigantic bee on the part of the people in the Peace River country. The success of this project is dependent on the cooperation of all.

(Continued on Page Two)

FOUR LOCAL MEN OFF TO WILDS ON A HOLIDAY JAUNT

C. Stredulinsky, Ike Nelson, Harry Black and Kline Webb left Tuesday for a three weeks' trip which will take them as far as Summit Lake in the Peace River Canyon, they confidently expect.

They expect to fish on the way, but any fish under four pounds need to be returned to the water.

They will be returning home for the holidays; Walter Greene, returning to Drumheller after a visit with friends here and A. R. McMillan, on business to the capital. L. M. McEwen was a passenger to Peace River.

Sunday's plane brought two passengers to Grande Prairie, one being H. Haganbush, the southbound Yukon plane carried four passengers: three teachers on their way to summer school in Edmonton—Miss Wilma Robinson of Currie school; Miss Isabelle Cravahaw of Homestead school; Miss Joyce Ling of Demmitt school—and J. Crummy.

H. S. Day, surveying engineer, accompanied by C. W. Leslie, left for Haganbush on Thursday, July 20, to begin surveying a township line in an unsubsided territory to the B.C. boundary. This work is being done at the special request of the Monkmann Pass Highway Association, to further their road project through the mountains. It is being authorized under the direction of the Director of Surveys, P. N. Johnson.

T. J. Starkey is the cook with the survey party.

Kelly's Hamburger Shop To Open On Thursday Evening

Kelly's Hamburger Shop, which is a modern affair, at Grande Prairie, will be open for business Thursday evening, July 7.

The shop is the first of its kind in town, specializing in hamburgers, is situated in the Tooley Building on the northeast corner of Third Avenue South and Second Street East, and is directed by Kelly's.

The new eating place is electrically fitted throughout and includes electric grill, electric toaster, and many other modern features.

The very latest lighting fixtures have been installed and they give a brilliant flow of light.

The color scheme is white and black.

Contracts For Installation Of Water-Sewer System Special Council Meeting

Contracts for work on the sewer and water installation were awarded at a special meeting of the town council held at 10 o'clock on Thursday night last week, at which there was a full attendance.

Construction work will be let to Nelson River Construction Co., Ltd., at a price of \$21,915.50. The contract for sewer pipes was awarded to the Alupac Pipe Products Co., Ltd., the bid being \$7,484.90; for waterworks materials to the Empire Waterworks Supply Co., Ltd. for a bid of \$4,625.12; for sewerage iron work to the Standard Iron Works, which bid \$888.75. The contract for machinery for disposal plant was left over for the 11th session.

Showing Of Oil And Gas Struck In The Bonanza Well

J. J. O'Connor, barrister of Calgary, and approximately three other men, arrived in Grande Prairie on Monday and Tuesday, having come in from Pouce Coupe.

The party included J. B. Hamilton, Associate Member of the Engineering Institute of Canada, and Henry V. O'Connor, barrister, Calgary.

Mr. J. J. O'Connor and his party are the representatives of a group of Calgary business men, who are developing the Pouce Coupe oil field in the Bonanza area on the Alberta side.

Mr. O'Connor has just returned from the field, stated that the first test well on the structure is now drilling at a depth of 873 feet with rotary equipment. The well is located about two and a half miles southeast of the north-west corner of the Bonanza area.

The well being drilled encountered a showing of oil and gas at 840 feet, and approximately three feet thick, but drilling was continuing with the expectation of reaching another 100 feet.

As soon as this test is reached it is proposed to send the flow for commercial production.

Should the production, observed at this point, be obtained at this horizon, it is the intention to skid the rig to a new location and make a deep test at that point.

Mr. O'Connor stated further that when the preliminary testing of the field was completed, the potential production ascertained, the residents of this district will be given an opportunity to assist in the development of the field.

HEAVY RAINS FALL IN THE EAST OF THE SMOKE AREA

According to W. L. Trotter, mail carrier, the East of the Smoky area, including Valleyview, was drenched with heavy rains on Thursday and the night before last week.

Mr. Trotter further stated that some twenty cars were stuck on Friday between the Smoky and Sturgeon Heights. Many of the occupants of the cars were teachers on their way to the outside to spend their holidays.

TWO ALBRIGHT BOYS DO THEIR BIT FOR M. P. H. ASSOCIATION

Lawrence Thompson and Jimmy Eastman of Albright returned to their homes from a ten-day freighting trip to the Yukon.

The boys report a good trip despite some wet weather. Both were slated over by beautiful scenery and the wild game life. They also noted the interest displayed by the various camps in cutting the trail.

PARTY BEING ORGANIZED FOR TRIP INTO MONKMAN PASS

Plans are being made to conduct a truck party through the Monkmann Pass as far as the wonderful Kinuso Falls are completed.

The party for this most unusual jaunt and for the distinction of being on the first motor vehicle to penetrate so far into the pass. The trip may take three or four days, to enable the sightseers to enjoy the scenic beauties of the route.

All who are interested in the work being accomplished on the new highway, as well as in the beauties of the area, are invited to join the trucks when they leave with all aboard for the Monkmann Pass Highway.

Many Cars Use New Road Bad Heart, Heart Valley

HEART VALLEY, July 1.—The construction of the new road across the Bad Heart and Heart Valley was completed on Thursday, June 23. Many cars with interested sightseers crossed back and forth on Sunday the 26th.

It is altogether a splendid achievement and speaks eloquently of the cooperation and spirit of friendliness existing between the two settlements.

The road will be greatly improved after a new gravel surface is laid help to pack and settle the surface. The next thing is a bridge to span the river.

Of Interest To Agriculturists

DEVELOP LEADERSHIP IN FARM CLUB WORK

There are many projects embodied in the scheme of the work of the Boys' and Girls' Farm Clubs of Canada—live stock, field crops, horticulture, and home economics—but something more than competency in the various branches of agriculture is being demonstrated by the young farmerettes and farmers in the many fairs and exhibitions now being held throughout the Dominion. This something is self-reliance, as a result of knowledge and practical efficiency, and self-reliance is beginning to be a part of the life of the young farmerettes and farmers in the many fairs and exhibitions now being held throughout the Dominion. This something is self-reliance, as a result of knowledge and practical efficiency, and self-reliance is beginning to be a part of the life of the young farmerettes and farmers in the many fairs and exhibitions now being held throughout the Dominion.

hilitors has been the quiet, masterful leadership of the local boy leaders of the various clubs. In this, the whole scheme of farm education, "Learn to Do by Doing," is completely justified. The originators of the Boys' and Girls' Farm Club movement evidently built better than they knew. The movement was designed to develop interest in the farm and farm life, to provide a practical education in agriculture and home economics; to improve farm practices; to encourage the use of better live stock and seed; and to train the young people for citizenship in their respective districts. The proving ground of these purposes is, and has been, the agricultural fair, and throughout the Dominion in the open forum all that has been laid down has been amply

demonstrated, but above all has emerged the unsuspected genius in Canadian youth for leadership which has apparently only to be given the opportunity to be able to produce an abundant supply of future keymen in years to come. As an example of what the boys and girls of the farm clubs are doing at the fairs all over Canada, the recent Ormstown Fair, as being one of the earliest of the year, may be cited. The members of three junior calf clubs (37 members in all: 9 from the Howick Ayrshire Club; 7 from the Ormstown Ayrshire Club, and 11 from the Chateaugay Valley Holstein Club) exhibited calves, yearlings, and two-year-old heifers which attracted much attention, the showman ability of the members of the club being outstanding. In the Ayrshire calf class there were 18 entries for the two Ayrshire clubs and there were 11 entries in the yearling class and 7 entries in the two-year-old Ayrshire class. In the Holstein section, 15 calves, 10 yearlings, and 6 two-year-olds, and five groups of three animals each were shown, but it was conceded that the great success to which the three clubs had attained and demonstrated at the fair was due in no small part to the untiring energy and capacity of their respective leaders, so much that J. P. Fleury, field man of the Dominion Live Stock Service, who is in charge of the calf clubs of the district, was moved to pay tribute to the self-reliance and efficiency shown in leadership in their groups.

The membership of the Boy's and Girls' Farm Club Work, under the Canadian Council, is growing solidly and surely; the latest figures compiled by the Council show there are 33,141 members.

INTERESTING STATISTICS

An interesting study was recently made by Professor Harold C. Clark of Columbia University in respect to the various types of vocational classifications in the United States and he quotes some interesting statistics. His study covered the sixteen-year period, 1920-36. Here are his findings:

Medicine	\$4,850
Law	4,730
Engineering	4,410
Dentistry	4,170
Architecture	3,820
College Teaching	3,050
Journalism	2,210
Library Work	2,020
Ministry	1,980
Skilled Trades	1,430
Public School Teaching	1,350
Nursing	1,310
Unskilled Labor	795
Farming	580
Farm Labor	485

In commenting on these figures in Farm and Ranch Review, C. W. Peters says: "The earnings of the farmer fall below even that of unskilled labor. The farmer is the center of population, with the high wages, the comparatively long hours of work, and the superior living conditions, inexorably drawing the rural population into his orbit. The crude and ill-paying life on the farm, its isolation and killing working hours, have only one end: the complete enslavement of the countryside. The farmer is definitely becoming the 'heir of wood and drainer of the world' for the urban communities."

"If these abominable conditions cannot be corrected, will any thinking farmer be prepared to condemn his children to the laborious life on the soil?"

Romantic Origin Of Fried Chicken

Utility and sentiment were blended at the recent banquet of the First Poultry Promotion Congress held under the auspices of the Quebec Provincial Committee of the Canadian Poultry Association at Montreal. Not only did fried chicken prove the most popular dish, but it was the poultry on the menu that was the general taste, and in giving the recipe for fried chicken as served at the banquet, an interesting story of the origin of fried chicken was told.

Poultry, said Mons. Thomas, president of the Congress, is a step in the direction of economy. Beef, which might otherwise be used more freely than necessary at the time of killing, can be saved for use in seasons when meat is difficult to obtain. The Dominion Department of Agriculture has issued full directions on this subject in a pamphlet, "Home Preservation of Meats, Poultry, Fish, and Soups," which may be obtained free on application from the Publicity and Extension Division of the Department at Ottawa.

Meat may be canned as successfully as fruits and vegetables. Besides giving a supply of fresh meat for emergencies, the canning of some of the meat butchered on the farm is a step in the direction of economy. Beef, which might otherwise be used more freely than necessary at the time of killing, can be saved for use in seasons when meat is difficult to obtain. The Dominion Department of Agriculture has issued full directions on this subject in a pamphlet, "Home Preservation of Meats, Poultry, Fish, and Soups," which may be obtained free on application from the Publicity and Extension Division of the Department at Ottawa.

Besides giving a supply of fresh meat for emergencies, the canning of some of the meat butchered on the farm is a step in the direction of economy. Beef, which might otherwise be used more freely than necessary at the time of killing, can be saved for use in seasons when meat is difficult to obtain. The Dominion Department of Agriculture has issued full directions on this subject in a pamphlet, "Home Preservation of Meats, Poultry, Fish, and Soups," which may be obtained free on application from the Publicity and Extension Division of the Department at Ottawa.

Meat may be canned as successfully as fruits and vegetables. AERONAUTICAL TIT-BITS

By J. W. Neil

THE FLYING FORTRESS FOLLY

Somebody writing on this silly idea of Britain buying American aeroplanes suggested that they should buy the all-metal, motor-driven bomber, which has been labelled the "Flying Fortress" by the press. Any sensible citizen in any Air Force will agree that the big all-metal long range bomber is the silliest aeroplane that anybody ever imagined. One lucky shot would be an incendiary bomb on a ordinary machine gun, and away go four good motors, some tons of bombs, and several good men.

Until about a year ago the German aircraft industry was busy turning out four-engine bombers—Heinkel, Dornier, Focke-Wulf and Junkers were all making the type. Then quite suddenly all these four-engine bombers were exposed for sale to the world at large.

They have been offered as war machines, and as passenger-carrying machines, but nobody seems to want them. The reason for this is that the Germans have wisely decided that the more you split up your engine loads the less you lose with each machine that is shot down or which has to come down because of mechanical defects in motor or aeroplane. Gossip attributes this change of policy to General Ernest, one of the most able of war-time fighting pilots and now in a position which corresponds pretty well to the British Director of Technical Development at the Air Ministry. If this change of policy is due to General Udet, personally he deserves full credit for it. At any rate, a fighting pilot who is still one of the world's most skillful aviators, he is more likely to see the weakness of the so-called Flying Fortress than most people. And its weakness is that it is not a fortress, even to the extent that an outside battleship is a floating fortress, simply because an aeroplane cannot carry armor. And the vast area and bulk of these big bombers offers a magnificent target to the unskilled gunner, whether in an aeroplane or on the ground. But we are getting away from our story, why does Britain buy American "airplanes" when we have such facilities here in the world for building aeroplanes?

Reference to "All the World's Aircraft of 1937" gives the following information about Canadian aircraft firms in alphabetical order:

Armstrong Siddeley Motors, Ltd., 301 Slater Street, Ottawa. The manager, Mr. Windsor, used to be at the Royal Aircraft Factory before it became the R. A. E. He is highly capable. So far as we know they do not build any aeroplanes, but they look after Siddeley motors and in these days do repairs or rebuild for Armstrong-Whitworth and Avro machines.

Bellanca Aircraft of Canada, Ltd., 1440 St. Catherine's Street, West Montreal—Is a branch of the American Bellanca Company. It was founded in 1929, just at the tail-end of the American boom, and somehow it has survived since then, but one does not hear of its doing much. The big Bellanca float plane, which has done so well for Mackenzie River air transport, is definitely an American product.

Boeing Aircraft of Canada, Ltd., Vancouver, B.C.—Also started in 1929. It is allied with the Hoofar Aircraft of Vancouver, a yacht-building firm. They have built flying boats for the west coast anti-smuggling patrol which were run by authentic Horse Marines—the air branch of the Royal Canadian Mounted Police.

Then in the general slump that business fell off, they took to building ordinary motor-coats. Last year this concern got a contract from the Canadian government to build Blackburn Sharks, but it is probably an assembly job rather than actual building.

The Canadian Car and Foundry Company, Ltd., has its head office at Montreal. It is the largest manufacturer of railway material in Canada. Last year it built some Grumman two-seat fighters for Mexico—which probably were re-shipped to Red Spain soon afterwards.

Canadian Vickers is at Montreal. The aircraft business started in 1923 and made some quaint flying boats which may be remembered—the Vedette and the Vancouver. More recently the firm has made Northrop Delmas and to 30,000 feet in the air, carries six Browning machine guns and is considered a handy little thing to have around when bombers come over. The British people saw it in action on Empire Air Day—Toronto Telegram.

Cub Aircraft, Ltd., Hamilton, Ont., is a small firm which has been formed recently to make the American Taylor Cub under license.

The De Havilland Aircraft of Canada, Ltd., have a fine new plant at Downsview, Ontario. Fairchild Aircraft, Ltd., Longueuil, Montreal, was recently acquired by a branch of the American Fairchild Corporation. Later they received an order from the R.C.A.F. for modified Bristol Blenheim's. The factory has 18,000 sq. ft. of floor space. It was built in September, 1930, and has been running full time ever since.

Fleet Aircraft, Ltd., Port Erie, Ontario, started up as a branch of the Consolidated Aircraft Corporation, United States. The existing factory was built in 1930 and was enlarged to five times its original size in 1931, chiefly to make Fleet trainers for the Royal Canadian Air Force.

The National Steel Car Corporation, Ltd., of Hamilton, Ontario, are one of the second biggest builders of rolling stock in Canada. They have taken a license to build Westland Lysanders.

Noorduyn Aircraft, Ltd., Curtis Reid Airport, St. Laurent, P.Q., is one of the most important firms in Canada. The president is W. R. G. Reid, one of the big banking families. Here the famous Noorduyn Norseman is built.

Other British aircraft constructors follow the example of the Bristol Company and the Westland Company in hooking up with existing Canadian firms. Britain could get a very nice supplementary supply. All aeroplanes built in Canada would be ordinary production types, and presumably there would be no experience with the more important types. Although many of the skilled workers might be, there would be nothing much for them to take back to the United States for the benefit of aircraft firms there. On the other hand, there would be nothing much for them to take back to the United States for the benefit of aircraft firms there.

DELEGATES OF BRITISH CHEMICAL SOCIETY ATTEND OTTAWA CONVENTION

The British government delegation which accompanied seventy-five members of the Society of Chemical Industry to Canada for the fifty-seventh annual meeting to be held at Ottawa is seen above in the lounge of the liner "Duchess of Atholl." Left to right: H. J. Poole, secretary of the society; Dr. R. E. Stradling, director of Building Research Station; Sir Gilbert Morgan, director Chemical Research Laboratory; Dr. J. J. Fox, chief chemist of the British government, and W. A. Darnon, chief inspector of Alkali Works. Inset is a picture of Viscount Leverhulme, president of the Society. The British Society will meet in conjunction with the Canadian Chemical Association.

WOOLWORTH HEIRESS BACK IN THE HEADLINES

Countess Haugwitz-Reventlow, the former Barbara Hutton, Woolworth heiress, is back in the headlines. Reports from London, where she has been making her home, indicate that she and her husband Count Kurt Haugwitz-Reventlow, Danish nobleman, are having serious differences over the upbringing and education of their son, Lance, and investment policies as regards the heiress' fortune. Above are pictures of the Count and Countess, while at the left is a picture of the little fellow, who is the centre of the main controversy. At the lower right is a picture of the Haugwitz-Reventlows.

PAPAL DELEGATION VISITS CANADA

The first papal delegation to come to Canada in years is shown above on board the Canadian Pacific liner "Duchess of Atholl" as the delegates reached Quebec. Named by His Holiness the Pope to escort his prelate, Cardinal Rodrigue Villeneuve, at the National Eucharistic Congress at Quebec, June 22 to 26, the delegates, with welcoming officials are: Front row, left to right—Mgr. G. Ferret, pontifical master of ceremonies; Mgr. M. Martini, apostolic protonotary; Captain Coyte of the Duchess of Atholl; Mgr. Sylvio Sericano, domestic prelate, and Augustin Milani, consistorial advocate. Back row—Mgr. Eugene Lafontaine, representing the central committee of the Congress; Dr. Filippo Spada, papal chamberlain; Rev. Dr. A. Vachon, Dean of the Faculty of Science at Laval University, who accompanied the group from Rome; Mgr. Umberto Mossini, charge d'affaires, apostolic delegation from Ottawa; Count Carlo Maselli Rocca de Cornigliano, of the Noble Guard; Canon J. A. Chamberlaine, representing His Eminence Cardinal Villeneuve.

MANY LOSE THEIR LIVES IN TRAGIC TRAIN WRECK

The known dead in the worst train wreck to occur in the United States in recent years has been set at 26, and there is a possibility that more bodies will be found. The tragedy took place when the famous "Olympian" train travelling across Custer's Creek plunged through a flood-weakened bridge into the water below. The train was en route from Chicago to Tacoma, Washington. Above is a picture of part of the submerged train as rescuers tear away debris in search of ill-fated passengers.

PLEADS INNOCENT TO SPY CHARGE

Here is Johanna Hofmann, 26, haldresser on the German liner "Europa," as she stepped from the U.S. Marshal's car to appear in court and plead not guilty to espionage charges. Miss Hofmann and 17 others, only three of whom are in custody in the United States, the others having fled the country, are indicted in connection with the alleged spy ring discovered by G-men. All four pleaded innocent and were held on bail of \$25,000 each pending trial August 1.

IN THE LIMELIGHT

Leon G. Turrou, ace New York G-man, who is credited with uncovering the sensational spy ring which resulted in the arrest of four alleged Germans on espionage charges. Turrou resigned from the force following the completion of the investigation and his story on the investigation was about to be published in a prominent newspaper when the government prohibited.

"TAYLOR IS A HE-MAN," SAYS MAX BAER

Lunching in New York where each went to see the Schmeling-Louis fight, Maxie Baer, former heavyweight champion, right, and Robert Taylor, left, popular screen star, are snapped by the camera. Maxie told reporters that if Taylor "didn't have so much invested in the movies, he'd make a darn good fighter." Max says Bob can punch an airbag better than 80 per cent of the fighters.

HEADS COMMISSION?

Principal and Vice-Chancellor Professor R. C. Wallace of Queen's University, who, it is reported, is likely to be offered the chairmanship of the special commission, established by act of the Ontario legislature to investigate the various cancer "cures" and serums used in Ontario.

PROMOTED

Dr. Charles Macdonald, O.B.E., M.C., who has been transferred from Victoria to Ottawa to assume the duties of Associate Chief Veterinary Inspector, Health of Animals Service, Dominion Department of Agriculture. He will have supervision of the work of meat inspection throughout the Dominion.

SHIRLEY HOLDS A PRESS CONFERENCE

En route to New York from the west coast, Shirley Temple stopped off in Chicago, where she held a press conference, informing reporters that her most interesting experience in the Windy City was seeing "those elevator trains that run 'way up on stilts'."

SCHOOL GIRLS PREPARE FOR BIBLEY SHOOT

A quintette of crack shots from Downe House School, Newbury, Berkshire, arriving at the school butts for practice before going to Biele to take part in the Empire-wide shooting annual.

IT'S STRAWBERRY TIME IN CANADA

Canada's annual strawberry crop is on the market and throughout the Dominion strawberries and cream, strawberry shortcake, stewed strawberries, and the making of home-made strawberry jam are the order of the day. The 1937 crop totalled 23,000,000 quarts, valued at \$2,225,100, and it is second only to apples in value as a fruit crop. In his "Compliment Angle" Isak Walton wrote, "Doubtless God may have made a better berry but doubtless God never did," and it is not hard to convince Mary, above, of the wisdom of Walton's remarks.

Here and There

A new air mail route was recently opened from Prince George to Germanen Landing in northern British Columbia.

A national insurance bill was given third reading by the Australian House of Representatives. The vote was 39 to 26.

Shortage of saleable grain at the lakehead, reduction in iron ore output and adverse general business conditions have combined to have many vessels tied up in ports of the upper Great Lakes.

A plan to make provincial medical organizations of the Canadian Medical Association is approved by seven of the nine provincial bodies represented at the national society's 25th annual convention at Halifax.

WEMBLEY NEWS

For clear-eyed, healthy activity like this you need three things—a well-nourished body, plenty of energy, and a good diet.

You'll find all three in Kellogg's Bran Flakes. The wholesome, energizing goodness of whole wheat, bran, and best of all is the delicious flavor of Kellogg's Bran Flakes. At your grocer's, ready to eat, made up by Kellogg in Canada, Ontario.

EAT TO FEEL FIT!

By the Gleaner

Mrs. Boyle and family left for their farm at Bear Lake on Sunday.

Mr. O. Evenrud left on Monday's train to visit his relatives in Calgary.

Walter Durdin expects to leave today to spend a few days in Edmonton with Mrs. G. Stokes.

Mr. and Mrs. Albeck and family and Billy Storm expect to leave today to camp at Sturgeon Lake.

Mrs. H. Black and Lois and June Thomson also left today with Mr. Mansfield for Edmonton.

Miss Loreen Fitzpatrick returned home by plane on Thursday. She reports a rough but enjoyable trip.

Miss Beulah Duffy is spending her three weeks' holiday with the Rooneys of Beaman.

Mr. and Mrs. George Black and Jean Cochran left Wednesday morning for Edmonton.

Douglas Gant left on Saturday to spend his vacation with Mr. and Mrs. Albert Smith of Lake Saskatchewan.

Mr. G. Tate left Calais on Sunday to visit friends in Edmonton and her son, Jimmie, in Fairview.

Mr. and Mrs. Barre and little daughter moved to Monday to Mrs. Pippin's house on Fourth Avenue North.

Mr. and Mrs. Mitchell of Rio Grande arrived in Grande Prairie on Tuesday to spend a few days with their daughter, Mrs. G. Cave.

Officers and leaders of the C.G.I.T. camp at Lake Saskatchewan went on Tuesday to spend a few days with their daughter, Mrs. G. Cave.

Mrs. C. Ann, after spending from Friday to the C.G.I.T. camp leaders at Lake Saskatchewan, returned to town on Tuesday.

About twenty local young people had July going to the Wapiti last Saturday evening.

The Misses Gwen and Doris Gant expect to leave on Sunday for a three week holiday at Banff and Lake Windermere.

Joyce and Evelyn Storm left on Saturday night to spend their holidays with Mr. and Mrs. G. Wilson of Glen Leslie.

Dorothy Storm left on Sunday to spend her vacation with the Mike Durdin's on their farm west of Grande Prairie.

Mr. B. C. Scully, who has been spending the last few days in Grande Prairie, will be in Grande Prairie on Sunday for their farm at Rio Grande.

Mrs. H. C. May and Vivian left today (Wednesday) for Leduc, with Mr. Mansfield, to stay with Mrs. McVey's parents at Leduc.

Mr. McVey hopes to bring his sister back for a visit.

St. Joseph's Academy gradually emptied during the past week. Mrs. Elliot, who was in charge, and her daughter going on Thursday to Rio Grande.

The Misses Aileen Chard and Frances Borwick left on Saturday with Will Logan and Herb Spers for a few days' visit with friends and relatives in Edmonton. Mr. Logan is on a business trip.

The Senior C.W.L. visitors from Buffalo Lakes and the Separate School children had a thoroughly good time on Saturday afternoon picnicking in the grounds of St. Joseph's Academy.

Mr. Kowensky drove Mrs. Kowensky and the girls out on Sunday. Mrs. Kowensky and Olive plan to visit in Stony Plain and Edmonton, and North to the reunion at Vermilion and maybe on to Banff. Mr. Kowensky will go out to collect his family in his own time.

Mrs. Mel Fowler returned on Tuesday evening from C.G.I.T. camp at Lake Saskatchewan and left early this (Wednesday) morning with Mr. Mansfield for Edmonton, where she will take charge of a senior C.G.I.T. Falls camp for a week at Lake Wabamun, and then connect a district camp of C.G.I.T. members of 12 to 14-year-old girls at Elk Island.

Mrs. Love and her little sons took care of a motorist, Mrs. Norman, while her sister, Mrs. Wm. Bailey, is at the hospital with little Muriel, who was taken up here Sunday, poisoned by chickenpox, but who is now on the way to recovery. The Baileys are moving today into the Belcher house on the Clairmont road.

Two Rivers School, 11 a.m. You are cordially invited to attend.

The SHAPSHOT GUILD

The Camera in the Kitchen

DO YOU ever carry your camera into the kitchen? Next time you want to take pictures indoors, and run out of subjects, try exploring the realm of stove, icebox and pantry. It's a happy hunting-ground.

Almost everything in a kitchen is a camera subject. The icebox and the china and aluminumware are a mine of still-life possibilities, and there are opportunities galore for "off-guard" pictures whenever a meal is being prepared.

The mixing of a cake can be a picture, if the big mixing bowl is snapped from a high angle with two hands busy with a spoon in the creamy batter. Mother breadlessly testing the cake with a broomstick is an opportunity for a "candid" shot. There are pictures, general or close-up, when the cake is being leaved. There is a splendid close-up in the cutting of the first slice, with the gleaming long-handled knife going through the fluffy loaf.

A pile of shining pots and pans may make a splendid picture, if the photographer chooses a proper angle and works out a "dramatic" lighting. China, wet and glistening in a drain rack, is material for pictures. Even the dishpan, foamy with suds as two hands squeeze out the dishrag above it, is a picture opportunity.

The icebox yields eggs and vegetables that can be worked into interesting "still" studies. A series of "busy hands" pictures is well worth trying—hands peeling a potato, with a long curl of peel hanging; hands polishing silverware or drying glassware. The proper distance from built-in subject is four to six feet. With this amount of light, one can take snapshots with a box camera at the largest lens opening, or use 1/25 second at f/8 or f/11 lens opening with cameras so marked. For close-up shots, a simple portrait attachment must be used with most cameras.

John van Gulder.

Six Hundred ..

(Continued from Page One)

meet and discuss the days gone by. Sports program, music, and other attraction to the afternoon's entertainment.

Baseball
Spirit River and Sexsmith ball teams clashed in the only baseball game.

The game was a see-saw affair with Spirit River winning by one run in a ten-innings battle, the score standing 11 to 1.

Dr. Garmey was referee.

The following box score tells the story:

Spirit River 620 120 203 2-11

Sexsmith 000 091 000 1-11

Chuck Warden of the Sexsmith team furnished the highlight of the game when he knocked out a home run in the eighth inning.

Brown of the same team, a high school pitcher, furnished another thriller when he knocked out a three-bagger in the sixth inning.

Batteries: Spirit River—Pat Squires and Fred White; Sexsmith—Lindsey, Spicer and Gust.

Other Games
In the ladies' softball game Sexsmith defeated Spirit River by seven innings by a score of 16 to 13.

Buffalo Lakes won from Clairmont in the ladies' softball by a small margin.

Religious Service
In the evening a religious service was held. Rev. H. E. Webb of Sexsmith Anglican Church delivering a message which was well received.

President of the Sexsmith branch of the Legion, stepped forward, saluted in the behalf of the Legion thanked Mr. Webb for his excellent address.

Mr. Webb was then presented to the service and rendered several appropriate numbers.

Mr. Webb at the outset of his remarks spoke of the pleasure it gave him to be present at the service.

He said that the member of the Legion who made arrangements with him to present the service, and that the Legion was not a religious body, but probably the organization had more than a plan to make other organizations.

Referring to the Great War, the speaker observed that the war could not be measured by the number killed and wounded but by the result of the struggle.

A community cannot be measured by its production but by the lives of her people to the influence they left behind, added Mr. Webb, who went on to say that there were three kinds of lives—white, black and statistical.

Referring to Confederation Day, Mr. Webb said that what fathers of Confederation accomplished could not be measured by a purely material jurisdiction in laying the basis of this great Dominion.

Men of science and others had sought their lives for the progress of the world, and the men who fought in the Great War and those who died had fought for the establishment of peace in the world, stated Mr. Webb, who added that the men who establish peace was to learn to live with others in the community.

At the conclusion of the address the band played the National Anthem and the most successful picnic was brought to a close.

Pilot-Officer Colin W. K. Milburn of Prince George, B.C., attached to the British North Aviation School at Carterton, Oxford, was killed when his plane cracked up near Filkins.

CLASSIFIED

First insertion, 2 cents per word; each consecutive insertion, 1 cent per word. Minimum total charge 25 cents.

Edmonton Exhibition Celebrates Its Diamond Jubilee On July 18 to 23

This is the 60th consecutive year for northern Alberta's Big Annual Fair, and Edmonton is celebrating this historical event by presenting the most interesting and spectacular show in its history week of July 18 to 23. The sum of \$35,000 has been expended on grounds, buildings and equipment in preparation for the Diamond Jubilee week at the Edmonton Exhibition and a record-breaking attendance is expected.

Long recognized as western Canada's outstanding live stock and agricultural show, the entire in these departments promise to surpass all former occasions. The space allotted to displays of farm machinery and equipment has been greatly extended in order to accommodate exhibitors, while the display of industrial, domestic and educational exhibits will be the largest and open country. One boy said, "I am certainly glad I went and would not have missed it. But I don't think I'll go back to a show as long as I carry seven pounds."

The party of young men of the river are doing a very good job improving the road to Stony Lake. A donation of \$15 was received from the Nampa boys to help in supplying provisions for this party.

The Association has received a parcel of towels from Mrs. H. Robertson, secretary of the Millarston Women's Institute. These will be forwarded to the camp.

Saturday night the radio brought music from the beautiful rustic lodge at Jasper National Park. Listening to the strains of the orchestra one could not help but vision the grandeur, the splendor and the expenditure in money that mountain resort represents. Jasper Park is a beautiful place, but Monkman Pass is an equal in natural offerings to the tourist.

Alex Watt, one of the members of the original executive, in a letter from Yellowknife asks for highway news. He reports 24 hours sunshine and the odd black and white mosquito. Alex acknowledged receipt of The Tribune's Special Monkman Pass Number.

Business is made largely by sentiment and yet we think sentiment is made by business. A man doesn't feel the way business looks; business looks the way a fellow feels. We have heard of a fellow who got so sure of an order that they felt so because they felt so sure of it; and he felt so sure of it because they were afraid they would. "As a man thinks, so he is," and as he thinks, sometimes, to some extent, is his business.

This is no time to earn your bread and butter by looking at it butter side down—Anon.

M. P. H. A. NEWS

Helmar Johnson, road foreman for Unit No. 2, came back from the trail Monday evening. He reported good progress in being made and that they are making a good trail. He seemed to be in a great rush to get back and Association officials could not tell whether he was anxious to get to work or whether he was wanting to get some more trout. He caught one which measured 22 inches. How is that for a fish story. Of course Helmar is fully protected with the necessary license—license for what? Fish stories or catching them?

The three Wembley boys who walked through the pass to Hansard a few weeks ago arrived back in town. They report that they were surprised at the easy grades and open country. One boy said, "I am certainly glad I went and would not have missed it. But I don't think I'll go back to a show as long as I carry seven pounds."

The party of young men of the river are doing a very good job improving the road to Stony Lake. A donation of \$15 was received from the Nampa boys to help in supplying provisions for this party.

FIRST CBC PARKS BROADCAST TO BE HEARD ON JULY 15TH

Sound Picture Of Banff National Park To Be First In New Series Made By Means Of Mobile Unit

CALGARY, July 6.—First broadcast in a series of special sound pictures, to be made by the CBC's new mobile unit, and based on the Banff National Park in western Canada, will be presented from Calgary Wednesday, July 13, at 8 p.m. The broadcast will be based on the Banff National Park.

The unit, which arrived at Banff recently following press demonstrations in eastern Canada, and which is the only one of its kind in North America, will be the means of introducing a new broadcasting technique to Canadian listeners. It is an acquisition of the Corporation's special event department and is being operated under the direction of R. T. Bowman.

The procedure to be followed in making the National Parks series never before has been attempted on this continent. Mr. Bowman, who will be assisted by Graham McInnes, a special commentator, will accompany the unit to the Banff park, where recordings will be made of people, places and things characteristic of this famous reserve. These recordings will include singing of birds, descriptions of canyons and fishing scenes, and interviews with park personnel. They then will be edited and woven into a central theme of script and music, the result being a series of pictures that are interesting and unimportant. The finished recorded broadcast will be both lively and entertaining.

The National Parks series, which will be heard fortnightly, will be presented again Wednesday, July 27, at 8 p.m. The Jasper National Park will be the subject of the broadcast.

Pictures and description of the CBC's new mobile unit appeared in last week's Tribune.

PRINCE AS CHOIR SINGER

When the De Svanke Choir visits London shortly, a tall young man with steel-blue eyes smiling beneath a tuft of black hair will be singing bass. He is His Royal Highness Prince Lennox-Montagu, favorite grandson of the King of Sweden.

A doctor, examining an Irish woman, remarked that she was "Sure I am heart is still in Ireland," replied the woman, "Well, your honor, I am a free Irishman," retorted the doctor. "Sure I hope it is not ulcerated," said the Irish woman, much perturbed.

Make Sure First "Run upstairs and wash your face, darling. I think Grandma wants to take you driving with her."

Mother, to son pantry: "Willie, what are you hunting for?" "You'll find it in the jar where the cookies were."

Joe: "See any change in me?" "Not a bit," replied the other. "I just swallowed fifteen cents."

"Sam, ah, yes," seen an alligator eatin' our youngest child!" "Sho' nuff! You know, ah thought sump'n been gittin' our chillun!"

No Sale "Two pennyworth of bicarbonate of soda for indigestion this time of night," cried the infatuated drugstore who had been aroused at 2 a.m. when a glass of hot water would have done just as well.

"Weel, weel," returned MacDougal. "I thank ye for the advice and I'll no bother ye after a good night."

The young reporter saw a hearse start away from a house at the head of a funeral procession. "Who's dead?" he enquired of the corner grocer, who was watching from his door.

"John Schmidt," "John Schmidt?" exclaimed the reporter. "You don't mean to say John Schmidt is dead?" "Well, yes, golly," said the grocer, "vot you tink dey doing mit him—rehearsin'?"

TRY THESE CHESTNUTS

A doctor, examining an Irish woman, remarked that she was "Sure I am heart is still in Ireland," replied the woman, "Well, your honor, I am a free Irishman," retorted the doctor. "Sure I hope it is not ulcerated," said the Irish woman, much perturbed.

Make Sure First "Run upstairs and wash your face, darling. I think Grandma wants to take you driving with her."

Mother, to son pantry: "Willie, what are you hunting for?" "You'll find it in the jar where the cookies were."

Joe: "See any change in me?" "Not a bit," replied the other. "I just swallowed fifteen cents."

"Sam, ah, yes," seen an alligator eatin' our youngest child!" "Sho' nuff! You know, ah thought sump'n been gittin' our chillun!"

No Sale "Two pennyworth of bicarbonate of soda for indigestion this time of night," cried the infatuated drugstore who had been aroused at 2 a.m. when a glass of hot water would have done just as well.

"Weel, weel," returned MacDougal. "I thank ye for the advice and I'll no bother ye after a good night."

The young reporter saw a hearse start away from a house at the head of a funeral procession. "Who's dead?" he enquired of the corner grocer, who was watching from his door.

"John Schmidt," "John Schmidt?" exclaimed the reporter. "You don't mean to say John Schmidt is dead?" "Well, yes, golly," said the grocer, "vot you tink dey doing mit him—rehearsin'?"

Town Fathers

(Continued from Page One) nothing could be done about it.

After it was pointed out by the Mayor that the same time limit on the airport grounds would expire on September 1, it was decided to renew the lease and at the same time try and see if the term of the lease could not be lengthened.

The Mayor suggested that application be made to the government to have a quarter section adjacent to the air field set aside to enlarge the field as the necessity arose. This was embodied in a motion and carried.

The following accounts were passed for payment: General, \$78.00; indigent relief, \$15.50; unemployment relief, \$125.05; Child's Welfare, \$36.00; medical aid, \$12.00; indigent hospital, \$62.25; labor, \$201.72. Total, \$1,172.47.

More About Cheap Money Following the passing of accounts, Mayor Tooley, in drawing attention to the opportunity of the town to secure money from the federal government sufficient and more to install the water and sewer system at 12 per cent interest, read a number of letters which had passed between himself and the provincial and federal departments.

He pointed out that in order to get this money it was necessary to get the approval of the provincial government.

As there seemed to be some misunderstanding in the matter, the Mayor observed that he finally wrote Mr. Dunning, Minister of Finance, and received a most encouraging reply.

"Noting from the letter," the instant I endeavored to confine myself to a somewhat general explanation of the legislation, I omitted touching on a further provision of the Act under which a loan not exceeding \$200,000 may be made available to any municipality or whatever corporation, notwithstanding the general allocation of loans as indicated in my previous letter."

The Mayor also read a letter from S. E. Low, provincial Treasurer, in which the Minister stated that every consideration would be afforded the town's submission.

It was decided to go into the whole question at a special meeting.

"As I've been trying to explain to you for the last two hours, this is no time for a story!"—Rite of the Race, France.

Many Matters

(Continued from Page One)

vation of timber, soil erosion, construction of two bridges—one across the Smoky and the other across the Athabasca—worm menace, etc.

Mr. Loggie, Mayor of Fairview, extended welcome to all to luncheon in the Fairview Hotel.

The treasurer's report, read by P. Riddick, showed a small balance in the bank.

Secretary P. J. Tooley gave a report relating to the Fort St. John-Vancouver air mail contract, awarded to the United Air Transport, Limited, and the assistance given by the Associated Boards of Trade, the Postmaster General, and J. McInnes, M.P. for West Edmonton.

"This," said Secretary Tooley, "makes possible the Peace River air mail and passenger service to the coast, to be instituted on August 1st."

The following officers were elected: Honorary President—J. E. Thompson, Grande Prairie. President—D. H. Koellin, Brownsville.

Vice-President—W. J. Thompson, Grande Prairie. Secretary-Treasurer—R. B. Gilpin, Fairview.

The committee decided to hold the next annual meeting at Beaver Lodge. Mr. MacDonald of Fairview spoke on Grain Standards and Agriculture.

On motion of J. C. McNeil, seconded by MacDonald, the Prime Minister of Canada be invited to visit the Peace River on his trip west this year.

Resolutions A resolution protesting the lack of government supervision in preventing fires and urging that the government take the necessary steps to protect the remaining forest and green timber now left standing was passed.

The resolution drew attention to the fact that the forest was being destroyed during the recent fires in the Peace River country.

That considering that considerable work has already been done on the project, the federal government and the provincial government should speedily resume the work and bring it to an early completion.

The following was another important resolution carried: "That the preservation of large bodies of water is desirable to maintain the water beds of the Peace River; and whereas the federal government has agreed to provide a port for seaplanes and a community pleasure resort, and now upon raising this lake by damming the outlet."

Recognizing the vast resources in the north country, a resolution was passed that the federal and provincial governments make the necessary of opening up a tractor road from Nollukewin to Great Slave Lake for winter transportation purposes.

The motion in a resolution also supported the activities of the Hines Creek Highway Association to build a road north of the Peace in Alberta and north of the province of British Columbia.

Deplored lack of some concrete action on the part of the federal Grain Enquiry, the following resolution was carried:

"That the Canadian government has had great expectations for some concrete results from the federal government in the present session, and that the delay in action is greatly deplored, and that the federal government be urged to take prompt action."

AND THAT the Canadian government be urged to take prompt action in the crop year commencing August 1st next, and that the minimum price for wheat be not lower than \$1.00 per bushel and not less than the price of water time during the crop year 1938-39.

It was also decided to record in complimenting the Hon. Thomas Reid, M.P. for New Westminster, B.C., in his successful fight for lower freight rates on domestic consumption.

A resolution supporting the Monkman Pass Highway and naming the federal and provincial governments to undertake the construction and completion of this highway project, absorbing many of the unemployed in the work, was also strongly supported.

An expression of sympathy was voted for the late Mr. J. E. Thompson, on the loss of his wife.

Many other matters were considered and resolutions passed in a busy session.

A vote of thanks was tendered the Fairview Board of Trade for its splendid hospitality.

The throne of the Sultan of Turkey is of massive beaten gold, and is with diamonds, rubies and emeralds set in it. It has been appraised at \$150,000.

Paragraphs of Personal Interest

Joe Crummy returned from a business trip to Edmonton on Tuesday.

J. A. Toombs was a business visitor to Dawson City on Tuesday's train.

Donald Jaeger, Tuesday celebrated his fifth birthday amidst a group of young friends.

C. Kitchen of The Block News was a passenger on Tuesday's train, en route to Edmonton on business.

Jack Lewis, who has been teaching school at Thorild, returned home by car on Monday.

Wm. Sharpe, M.L.A., returned Friday afternoon by car from a short business visit to Edmonton.

M. M. McGarvey, mail man from Taylor Flats to The Hope, was a visitor in Grande Prairie on Monday.
